jayson.monterroso@gmail.com
Alajuela, Costa Rica

EXPERTISE

Fullstack Development
Front End Development
Backend Development
Team Leadership/Coaching
Lead technical transformation initiatives
Distributed and remote work environments
Product development
Agile Methodologies
Startup growth and foundation-building

TECHNICAL SKILLS

FRONT END

React, TypeScript, Angular, React Query, Zustand, Zod, Redux, Backbone, HTML, CSS, SCSS, Tailwind, Styled Components

BACK END

NestJS, Node.js, Prisma, Express, Go, Python

DATABASES

Postgres, MongoDB, MySQL

BUNDLERS

Webpack, Vite, Babel

CMS

WordPress, Contentful

TESTING

Jest, React Testing Library, Enzyme, Cypress

CONTAINERS & ORCHESTRATION

Docker, Kubernetes, Flux CD, Terraform

CLOUD PLATFORMS

AWS, GCP, Netlify

MOBILE

React Native, Ionic (Capacitor), NativeScript

PROFILE

Experienced Software Engineer with a solid track record of delivering successful projects for global clients across various industries, including expertise with startups in their early stages. I have deep expertise in the full development life cycle, agile practices, and team leadership. I'm skilled in full-stack development, JavaScript, mobile, CI/ CD, and best coding practices. With over 18+ years of experience in web development, I'm committed to continuous learning and self-improvement and passionate about using my skills to deliver high-quality solutions.

EXPERIENCE

SENIOR SOFTWARE ENGINEER
Intevity | Under Armour | 2025 - Present

- Replaced MuleSoft APIs with scalable Node.js microservices, reducing licensing costs and bringing loyalty integrations in-house.
- Built event-driven AWS SQS/SNS architecture, improving loyalty microservice throughput and reliability.
- Integrated PredictSpring and Aptos POS, UA.com, OMS, SFSC, and SFCC across core commerce systems.
- On a separate commerce team, delivered Share & Transfer Cart end to end across the Next.js/React storefront and GraphQL APIs, including multi-region shared-cart and email flows.
- Built and hardened shoppable social, checkout, returns, search, and fulfillment features, applying enterprise-approved GitHub Copilot agentic workflows to accelerate delivery, automated testing, and documentation.

SOFTWARE ENGINEER III
Notch Financial | 2022 - 2025

- Led architecture and development of AP/AR platform, building Restful APIs and react apps with OCR capabilities.
- Designed and implemented payment systems with PDF invoice APIs, multi-provider integrations (Stripe, Adyen, Balance), and responsive customer/supplier portals.
- Built OCR bills editor with real-time collaboration and third-party financial integrations, streamlining validation workflows, in a react app,
- Developed shared UI component library, reusable frontend/backend components, and migrated native apps to iOS/Android web app, improving scalability and time-to-market.
- Ensured quality through comprehensive unit testing and active participation across the full SDLC from discovery to deployment.
- Built/maintain cloud infrastructure using GCP services including Cloud Storage, Cloud Tasks, Cloud Run Jobs, Cloud functions, and Secret Manager with Docker and Kubernetes deployment.

SOFTWARE ENGINEER
Stackhawk | 2020 - 2021

- Built the foundation of beta and production-ready product UI in React, integrating with gRCP microservices for security scan data.

EDUCATION

Bachelor of Computer Systems Engineering
UNADECA | 2008 | Costa Rica

SKILLS

Problem-solving
Strong technical vision and ability to guide teams
Strong communication and collaboration abilities
Strong design sensibility for Ul/ UX
Ability to create exceptional user experiences
Teaching

Soccer

- Enhanced accessibility (a11y) and collaborated with design/product teams to release new features.
- Led migration of marketing site from WordPress to Contentful (Headless CMS), improving load speed, SFO, and usability.

SOFTWARE DEVELOPER
Gorilla Logic | 2017 - 2020

Development Lead @ Serena and Lily

- Developed SFCC sales estimate module using, reducing manual work for sales reps and improving website functionality.
- Enhancing site performance, load speed, accessibility, and overall user experience.

Software Developer @ Splunk / VictorOps

- Leading full redesign and migration from WP to Headless CMS approach (Jekyll + Contentful + NodeJS + Netlify + React).
- Planned and implemented Ul library, optimizing performance and ensuring A11y compliance and consistency across projects.

FRONT END ENGINEER
Eleven Systems | 2016 - 2017

- Built scalable Angular modules for a large financial web application, integrating RESTful API services with complex data.
- Designed and implemented financial module UI/UX, including advanced chart visualizations with Highcharts and Salesforce integration.

PRINCIPAL LAYER ENGINEER
Prodigious LATAM | 2013 - 2016

- Redesigned and migrated smartusa.com website Ul architecture to use Java services, handling Ul planning, development, testing, and bug fixing.
- Built multiple Facebook social apps and games to drive engagement.
- Developed a 3D vehicle interior viewer using Three.js.

SENIOR WEB DEVELOPER
Accenture | 2011 - 2013

- Built a hybrid iOS/Android apps for Merck Pharma.
- Backend architecture and functionality in PHP/WordPress for costaricavacations.com, including custom plugins for Razuna CDN.
- Created a SPA with Backbone.js for Gatorade to display sports scores and statistics via RESTful.
